SemaConnect

# Electric Vehicle Charging Stations

We would like to announce our new Electric Vehicle Charging Stations from SemaConnect at our property!

These EV Charging Stations can charge all new generation electric and plug-in hybrid vehicle such as the Chevy Volt, Nissan Leaf, Ford Focus Electric, Honda Fit Electric, BMW ActiveE and more. The stations are completely safe, easy and reliable to use and as simple as plugging in your cell phone.

If you're thinking about purchasing an electric vehicle, have one, or know someone who has one, be sure to spread the word about our new charging stations!

Thank you and Happy Charging!

# How to charge an EV

1. Hold your SemaCharge Pass up to the charging station's card reader symbol to authenticate.

2. Unplug the connector from the charging station and insert it into your electric vehicle. Once you hear the "Click," you'll know that it's secure.

3. Once the station turns from available (blue lights) to charging (green lights) your vehicle has successfully started charging.

When your electric vehicle is fully charged, or you decide to end your charging session, simply unplug the connector from your vehicle, coil the cord around the bracket and plug the connector back into the station.

## SemaCharge Pass
